

EXPLORING SCIENCE PRACTICES

Early Explorations

Play, learn, and discover together!

EXPLORING SCIENCE PRACTICES

Early Explorations

Try this with your baby, toddler, or preschooler!

1

Encourage your child to look at and touch each of the surfaces on the table. **Ask early learners:** *How does it feel? Is the felt soft or hard? Which is shinier, the felt or the foil?*

2

Help your child drop or spray water onto each surface. **Ask:** *What do you notice? Where does the water go?*

3

Together with your child, use eyedroppers and sponges to move water around. **Ask:** *How does the water flow on each surface? What do you notice about its shape?*
