The main image is a composite of three photographs. The top left shows a satellite in space against a dark background with stars. The bottom left shows a magnifying glass held over a globe, which is resting on a stone wall. The right side shows a person standing in a desert landscape, holding up a camera to take a picture. The word "GLOBE OBSERVER" is written vertically along the right edge of the composite image.

Join a global community,  
become a citizen scientist.

Your observations complement  
NASA's to understand Earth.
