# What Am I?

I have tiny transistors that are  
only 30 nanometers across.  
A nanometer is a billionth of a meter.

I have particles of titanium dioxide  
that are only 50 nanometers across.  
A nanometer is a billionth of a meter.

I have bumps covered in tiny,  
nano-sized whiskers.  
A nanometer is a billionth of a meter.
